- **The Five –day
plan to stop
smoking**

- Several programmes to stop smoking were conducted by Global Mission and health department inside the unreached areas, but we choose to speak about our programs in Mauritania

Five days to stop smoking impact in Mauritania

- Mauritania, an unreached country in our Division has the highest rate of tobacco consumption in the world .The ountry is an Islamic republic.

- Knowing that, health department and global mission found a strategy to run five-day plan to stop smoking in the capital city Nouakchoot, starting on March 16, 2014 at the University of Nouakchoot.

- As it was a success we continue each following year to visit other twons and schools of the country. ADRA Mauritania , the Mauritanian ministry of health and some muslims leaders facilitated and assisted us in our programme of stop smoking. We are very grateful for that.

- NGOs, students, and Muslims leaders were trained and equipped how to help to stop using tobacco.

- finally we were very happy to hear that the country voted a law on May 14, 2018, to regulate the production, importation, consumption of tobacco product, to reduce its negative effect on the entire population.

- The law voted prohibits all form of tobacco advertising and promotion without exception

- The law also prohibits smoking in all indoor public place and public transport without exception.

- We continue praying that our program will give a positive impact on the entire population.

- We are well known by the ministry of health of Mauritania. During our last visit in Mauritania We were include in the country programme to fight againts the consuption of tobacco.

- We thank the almighty God and the strong support of ADRA Mauritania and Western Sahel Unions who help so much in all our programmes
- To our God be the glory.
